Re: Application for [Job Title]

Dear [Hiring Manager Name / Hiring Team],

I am writing to express my interest in the [Job Title] role at [Company Name]. As a Senior Android & Flutter Developer with 4.6+ years of experience architecting and shipping production mobile applications, I have delivered 20+ Play Store titles generating 1.6M+ combined downloads, and currently lead a team of 4 mobile developers through sprint planning, code review, and release ownership. I believe this combination of hands-on technical depth and team leadership would let me contribute from day one.

Over my career at Redspark Technologies and Rydot Infotech, I have owned the full mobile development lifecycle — from architecture decisions through Play Store release — across healthcare, fintech, agri-tech, and social platforms. I work primarily in Kotlin, Java, and Dart/Flutter, applying MVVM and Clean Architecture to build maintainable, scalable client code, and have integrated real-time and hardware-facing SDKs including Agora RTC/RTM, Firebase, Socket.IO, TensorFlow Lite, and Bluetooth (BLE). Two projects I built — a live astrology platform and an agri-tech companion app — independently reached 500K+ and 100K+ downloads respectively, and I have integrated 12+ third-party SDKs across my projects without a production incident.

Beyond individual delivery, I have mentored junior engineers, run code reviews, and driven sprint planning for a 4-person team, while staying current with modern, AI-assisted development workflows to move faster without sacrificing code quality. I am now looking for a Senior or Lead Android/Flutter role where I can apply this mix of architectural ownership and team leadership to build products at greater scale.

I would welcome the opportunity to discuss how my experience aligns with your team's needs. Thank you for considering my application — I have attached my resume for your review and look forward to the possibility of speaking further.

Sincerely,

Zeel Modh
