PROFESSIONAL SUMMARY

Senior Android & Flutter Developer with 4.5+ years of experience architecting and delivering high-performance, production-grade mobile applications across 20+ Play Store titles with 1.6M+ combined downloads. Experienced team lead who has guided a team of 4 mobile developers — driving sprint planning, code reviews, and on-time delivery. Deep expertise in Java, Kotlin, and Dart/Flutter with strong command of MVVM, Clean Architecture, and scalable design patterns. Proven track record of leading feature development end-to-end — from architecture decisions and SDK integrations (Agora, TensorFlow, Firebase, Socket.IO) to UI/UX implementation and Play Store deployment. Skilled at leveraging AI-assisted development workflows (Claude AI, Cursor AI, Codex, Gemini) to ship faster without compromising quality. Seeking a Senior/Tech Lead Android-Flutter role to drive technical excellence and build impactful products at scale.

TECHNICAL SKILLS

Languages	Java, Kotlin, Dart (Flutter), XML
Mobile	Android SDK, Flutter, React Native (Basic)
Architecture	MVVM, Clean Architecture, MVC, Repository Pattern
Networking	Retrofit, Volley, OkHttp, WebSockets, Socket.IO, REST APIs
Database	Room DB, SQLite, Firebase Realtime DB, Firestore
UI/UX	Material Design, Jetpack Compose (Basic), Adobe XD, Figma
Real-time SDKs	Agora RTC/RTM, WebSockets, Socket.IO
Firebase	Firebase Analytics, Crashlytics, FCM Push Notifications, Auth
Tools & DevOps	Git, GitHub, Android Studio, Gradle, Play Store Publishing
Leadership	Team Lead, Code Review & Mentoring, Sprint Planning, Task Delegation, Agile/Scrum
AI Dev Tools	Claude AI, ChatGPT, Cursor AI, Codex, DeepSeek, Antigravity AI, Gemini (Android Studio)
Other	TensorFlow Lite, Bluetooth (BLE), IoT Integration, Barcode/QR Scanning

WORK EXPERIENCE

Senior Android / Flutter Mobile Application Developer

May 2025 – Present

Redspark Technologies LLP | Vadodara, Gujarat

- Architecting and shipping production Android & Flutter apps across healthcare, fitness, gaming, and service verticals.
- Leading and mentoring a team of 4 junior Android/Flutter developers — conducting code reviews, delegating tasks, driving sprint planning, and ensuring on-time feature delivery.
- BGB: Engineered system-level call/SMS/app blocker using Android Accessibility Services with usage analytics, multi-tier monetization, and English/Turkish localization.

- ▶ **Mehanii:** Built GPS-driven job matching, performance analytics, automated invoicing, and bilingual (Arabic/English) UI for service professionals.
- ▶ **Calm Medical:** Delivered dual-role healthcare app (customer + store manager) with appointment booking, personalised flash sales, coupon engine, and Chinese/English localization.
- ▶ **Goalactico:** Developed real-time dynamic scoreboard, point table UI, in-game event timeline, and custom local timer logic for live sports tournament tracking.
- ▶ **3FitStyle:** Built full-stack social fitness platform — Instagram-style reels, WhatsApp-style group chat, Facebook-style community feeds, and in-app purchase subscription packages.

Jr. Mobile Application Developer (Android & Flutter)

Jan 2022 – May 2025

Rydot Infotech Pvt. Ltd. | Ahmedabad, Gujarat

- ▶ Owned full SDLC for 10+ Android/Flutter apps across agri-tech, enterprise, signage, security, and attendance domains — architecture to Play Store release.
- ▶ **Adama Farmer Reach** (100K+ downloads): Offline-first agri app with weather forecasting, expert Q&A, location-based dealer finder, loyalty rewards, and Firebase Analytics/Crashlytics.
- ▶ **Divine Talk** (500K+ downloads): Integrated real-time sockets for presence detection, redesigned chat/shop/dashboard, and implemented MVVM + LiveData architecture for a live astrology platform.
- ▶ **P2T Push-to-Talk:** Built enterprise security comms app with Agora RTC/RTM (audio/video calls), group messaging, SOS alerts, and real-time GPS tracking.
- ▶ **TurnoutK/TurnoutM:** Cross-platform attendance system with TensorFlow facial recognition, IoT BLE integration, and native Kotlin bridges resolving React Native HTTP client limitations.
- ▶ **Digital Walls:** Automated enterprise digital signage CMS — scheduled offline ad playback, YouTube API integration, 6-digit device security onboarding, and critical bug resolution.
- ▶ **ADAMA Sampark & Dealer Khata:** Farmer data management + dealer self-service apps with 10,000+ users, QR loyalty rewards, offline storage, and force/soft update mechanisms.
- ▶ Championed AI-assisted development (Claude AI, Cursor AI, Codex, DeepSeek) — cutting feature delivery time and improving code review quality across the team.

KEY PROJECTS & HIGHLIGHTS

Divine Talk | Kotlin · Java · MVVM · LiveData · Socket.IO

- ▶ Astrology consultation super-app with 500K+ Play Store downloads. Delivered real-time online/offline status via sockets, redesigned chat/shop/dashboard modules, and optimized pixel-perfect UI across all device sizes.

Adama Farmer Reach | Kotlin · Java · Firebase · Retrofit

- ▶ Comprehensive farmer companion app with 100K+ downloads. Features offline product browsing, weather forecasting, expert Q&A, location-based dealer finder, reward points, and user surveys.

P2T – Push to Talk | Kotlin · Agora RTC/RTM · GPS

- ▶ Enterprise communication app for security agencies with real-time audio/video calls, group chats, SOS emergency features, GPS tracking, and secure user authentication dashboard.

TurnoutK – Facial Recognition Attendance | Kotlin · React Native · TensorFlow · BLE

- ▶ AI-powered attendance system with offline/online facial recognition via TensorFlow, IoT Bluetooth device integration, LEDs status indicators, and native component bridging for React Native.

3FitStyle (Dovis) – Fitness Social Platform | Kotlin · Java · Socket.IO · Firebase · In-App Purchase

- ▶ Feature-rich fitness super-app combining Instagram, WhatsApp, and Facebook-style social experiences. Built end-to-end community feeds with short-form video Reels (Instagram-like), real-time 1:1 & group chat with read receipts and media sharing (WhatsApp-style), and Facebook-style community feeds with posts, workout/diet plans, and progressive updates. Implemented role-based access control for admin and community creator roles, in-app purchase packages (donation, plan, full subscription), QR-based community joining, and rich media interactions (like/comment/share). Play Store: play.google.com/store/apps/details?id=com.threefitstyle

Goalactico – Sports Gaming Platform | Kotlin · Java · Custom Timer · REST APIs

- ▶ Live sports scoreboard and tournament management app. Engineered dynamic point tables with unique UI, real-time in-game event tracking (goals, penalties, assists), custom local countdown timer logic, and game timeline visualisation. Supports browsing upcoming games, tournaments, and events with user-generated posts and player community feeds.

Truequea – Multi-Profile Marketplace | Kotlin · Java · WebSockets · REST APIs

- ▶ OLX-inspired multi-profile marketplace with service exchange functionality. Built Netflix-style sub-accounts with PIN-based profile switching, business profile switching, buy/sell listing flows, and service posting & exchange modules. Integrated real-time chat supporting multiple user type flows — chat approval workflows, direct chats, and quotation-sharing chats between buyers, sellers, and service providers.

Mehanii – Service Professional Platform | Flutter · Dart · GPS · Firebase FCM

- ▶ Bilingual (Arabic-English) digital platform for service professionals. Integrated real-time location-based job notifications, unified calendar with map navigation, performance analytics (completion rates, ratings, earnings), automated invoicing, and secure payment flows.

BGB – Smart Call & App Blocker | Kotlin · Java · Android Accessibility · Multi-language

- ▶ TrueCaller-alternative app with advanced blocking — calls, SMS, websites, and app usage controls. Built usage analytics dashboard, multi-package monetization model, and full multi-language support (English/Turkish) using custom Accessibility Service integrations for deep system-level management.

Assistant Chatbot SDK – WhatsApp-Surpassing Chat Engine | Kotlin · Java · WebSockets · Custom SDK

- ▶ Customizable white-label chatbot SDK with real-time WebSocket engine, online/offline presence, typing indicators, read receipts, and persistent chat history. Dynamic theming APIs let developers customize colours, fonts, and button styles at runtime — suitable for enterprise support and AI assistant use cases.

Calm Medical – Healthcare Super-App | Flutter · Dart · Firebase FCM · Multi-language · Payment Gateway

- ▶ Dual-role medical app (customer + store manager) with appointment booking, personalised flash sales triggered by birthdays/anniversaries, coupon redemption, real-time push notifications for deliveries, and Traditional Chinese/English localization.

ADAMA Dealer Khata – Self-Service Dealer App | Kotlin · Java · React Native · QR Scanner · REST APIs

- ▶ Dealer self-service app with full customer ledger, soft-copy invoice/voucher downloads, QR loyalty rewards, product scheme recommendations, and native Kotlin bridges resolving React Native HTTP client limitations for complex authenticated API flows.

Digital Walls – Smart Digital Signage CMS | Java · YouTube API · CMS Integration · Security

- ▶ Enterprise digital signage CMS with auto-shutdown after ad playlist, 4-minute scheduled content refresh, offline CMS playback, YouTube Data API integration, and 6-digit device onboarding security. Resolved critical bugs ensuring uninterrupted 24/7 display operations.

Kora MTM – Inventory Management | Flutter · Dart · Barcode Scanner · REST APIs

- ▶ Cross-platform Flutter inventory app for store staff with multi-dimensional product filtering (fabric/design/colour), barcode scanning order creation, order lifecycle tracking, and offline-capable data caching.

EDUCATION

B.Tech – Information Technology

2018 – 2022

U.V. Patel College of Engineering, Ganpat University | CGPA: 7.84 / 10

HSC (Science)

2018

GSHEB Board | 61.10%

CERTIFICATIONS

- ▶ Android App Development Master Course with Java | Android – Udemy
- ▶ The Complete Android Kotlin Developer Course – Udemy
- ▶ Introduction to Flutter Course – Simplilearn | SkillUp

ACHIEVEMENTS & IMPACT

- ▶ Shipped 20+ production Android/Flutter apps to Google Play Store across agri-tech, healthtech, fintech, enterprise, and social domains.
- ▶ Published 30+ apps across Google Play Store — spanning personal, enterprise, and client projects across diverse domains.
- ▶ Contributed to 1.6M+ combined Play Store downloads — including a 500K-download astrology platform and 100K-download agri app.
- ▶ Led and mentored a team of 4 mobile developers for 7 months — overseeing sprint planning, PR reviews, and on-time delivery of production features.
- ▶ Promoted to lead feature development within 2 years — independently owned architecture, SDK integration, and Play Store releases.

- Integrated 12+ third-party SDKs (Agora, TensorFlow Lite, Firebase suite, Socket.IO, IoT BLE, YouTube API) with zero production incidents.
- Adopted AI-powered dev workflows (Claude AI, Cursor AI, Codex, Gemini, DeepSeek) — reduced debugging and boilerplate time by ~40%.
- Built and published portfolio at github.com/zeelmodh showcasing code quality, architecture patterns, and side projects.
