

ZEEL MODH

Senior Android & Flutter Developer | Mobile Application Engineer | 4.6+ Years Experience

Vadodara, Gujarat, India | +91 8155849137 | zeelmodh12@gmail.com | zeelmodh.github.io/zeel-modh-portfolio | linkedin.com/in/zeel-modh48b993217 | github.com/zeelmodh

PROFESSIONAL SUMMARY

Senior Android & Flutter Developer with 4.6+ years architecting and shipping production-grade mobile applications across 20+ Play Store titles with 1.6M+ combined downloads. Leads a team of 4 mobile developers — owning sprint planning, code review, task delegation, and on-time delivery in Agile/Scrum environments. Deep expertise in Kotlin, Java, and Dart/Flutter, applying MVVM, Clean Architecture, Repository Pattern, and SOLID principles to build scalable, maintainable client code. Proven record of owning the full mobile SDLC — architecture, third-party SDK integration (Agora, TensorFlow Lite, Firebase, Socket.IO), REST API integration, performance optimization, and Play Store release management. Comfortable working independently on complex technical problems while mentoring junior engineers and collaborating cross-functionally with product and design. Seeking a Senior Android Developer, Senior Flutter Developer, or Mobile Application Engineer role at a product, service, or growth-stage company to drive technical excellence and deliver measurable business impact at scale.

TECHNICAL SKILLS

- Languages:** Kotlin, Java, Dart, XML
- Android Development:** Android SDK, Jetpack (Navigation Component, WorkManager, LiveData), Jetpack Compose (working knowledge), Android Accessibility Services, Android Studio
- Flutter Development:** Flutter, Dart, Flutter Widgets, State Management, React Native (basic)
- Architecture:** MVVM, Clean Architecture, MVC, Repository Pattern, SOLID Principles, Dependency Injection, Scalable Architecture
- Concurrency & Reactive:** Coroutines, Flow, LiveData, Multithreading
- Networking:** Retrofit, OkHttp, Volley, REST APIs, JSON, WebSockets, Socket.IO
- Data & Storage:** Room DB, SQLite, Firebase Realtime Database, Firestore, Offline-First Caching
- Firebase & Cloud Services:** Firebase Auth, Cloud Messaging (FCM), Crashlytics, Analytics, Firestore
- UI/UX:** Material Design, Jetpack Compose (basic), Responsive UI, Adobe XD, Figma
- Real-Time & Communication SDKs:** Agora RTC/RTM, WebSockets, Socket.IO, Push Notifications
- Hardware/AI Integrations:** Bluetooth (BLE), IoT Integration, TensorFlow Lite, CameraX, Barcode/QR Scanning, Google Maps & Location Services
- Testing & Quality:** Unit Testing (foundational), Code Review, Debugging, Performance & Memory Optimization
- DevOps & Tools:** Git, GitHub, Gradle, Play Store Publishing, App Bundle, CI-oriented workflows
- Payments & Localization:** Payment Gateway Integration, Internationalization/Localization (English, Turkish, Arabic, Chinese)
- Leadership:** Team Leadership, Mentoring, Sprint Planning, Task Delegation, Agile/Scrum, Stakeholder Collaboration
- AI-Assisted Development:** Claude AI, Cursor AI, Codex, Gemini (Android Studio), Antigravity AI

WORK EXPERIENCE

Senior Android / Flutter Mobile Application Developer <i>Redspark Technologies LLP</i>	May 2025 - Present <i>Vadodara, Gujarat</i>
- Architected and delivered production Android & Flutter applications across healthcare, fitness, gaming, and service verticals, taking each from technical design through Play Store release. - Led and mentored a team of 4 junior Android/Flutter developers, running code reviews, delegating sprint tasks, and driving 100% on-time feature delivery. BGB (Call/App Blocker): Engineered a system-level call, SMS, and app-blocking engine using Android Accessibility Services, adding usage analytics, multi-tier monetization, and English/Turkish localization. Mehaniii: Built GPS-driven job matching, performance analytics, automated invoicing, and a bilingual (Arabic/English) UI for service professionals. Calm Medical: Delivered a dual-role healthcare app (customer + store manager) with appointment booking, personalized flash sales, a coupon engine, and Chinese/English localization. Goalactico: Developed a real-time dynamic scoreboard, point-table UI, in-game event timeline, and custom local timer logic for live sports tournament tracking. 3FitStyle: Built a full-stack social fitness platform combining Instagram-style Reels, WhatsApp-style group chat, Facebook-style community feeds, and in-app purchase subscriptions.	
Jr. Mobile Application Developer (Android & Flutter) <i>Rydot Infotech Pvt. Ltd.</i>	Jan 2022 - May 2025 <i>Ahmedabad, Gujarat</i>
- Owned full SDLC for 10+ Android/Flutter applications across agri-tech, enterprise, signage, security, and attendance domains, from architecture through Play Store release. Adama Farmer Reach (100K+ downloads): Built an offline-first agri-tech app with weather forecasting, expert Q&A, location-based dealer finder, loyalty rewards, and Firebase Analytics/Crashlytics. Divine Talk (500K+ downloads): Integrated real-time sockets for presence detection, redesigned chat/shop/dashboard modules, and implemented MVVM + LiveData architecture for a live astrology platform. P2T Push-to-Talk: Built an enterprise security communications app using Agora RTC/RTM for audio/video calls, group messaging, SOS alerts, and real-time GPS tracking. TurnoutK/TurnoutM: Built a cross-platform attendance system using TensorFlow facial recognition and IoT BLE integration, writing native Kotlin bridges to resolve React Native HTTP client limitations. Digital Walls: Automated an enterprise digital signage CMS with scheduled offline ad playback, YouTube API integration, and 6-digit device security onboarding. ADAMA Sampark & Dealer Khata: Delivered farmer data management and dealer self-service apps serving 10,000+ users, with QR loyalty rewards, offline storage, and force/soft update mechanisms.	

- Championed AI-assisted development workflows (Claude AI, Cursor AI, Codex, DeepSeek) across the team, improving code review quality and cutting feature delivery time.

KEY PROJECTS & HIGHLIGHTS

Divine Talk — Kotlin · Java · MVVM · LiveData · Socket.IO

Astrology consultation super-app with 500K+ Play Store downloads. Delivered real-time online/offline presence via sockets, redesigned chat/shop/dashboard modules, and optimized pixel-perfect UI across device sizes.

Adama Farmer Reach — Kotlin · Java · Firebase · Retrofit

Farmer companion app with 100K+ downloads featuring offline product browsing, weather forecasting, expert Q&A, dealer finder, and reward points.

P2T - Push to Talk — Kotlin · Agora RTC/RTM · GPS

Enterprise communication app for security agencies with real-time audio/video calls, group chats, SOS emergency features, and secure GPS-tracked authentication.

TurnoutK - Facial Recognition Attendance — Kotlin · React Native · TensorFlow · BLE

AI-powered attendance system with offline/online facial recognition, IoT Bluetooth device integration, and native component bridging for React Native.

3FitStyle (Dovis) - Fitness Social Platform — Kotlin · Java · Socket.IO · Firebase · In-App Purchase

Social fitness super-app with Reels-style short video, real-time 1:1/group chat, community feeds, role-based access control, and in-app subscriptions. Live: play.google.com/store/apps/details?id=com.threefitstyle

Mehanii - Service Professional Platform — Flutter · Dart · GPS · Firebase FCM

Bilingual (Arabic/English) platform with real-time location-based job notifications, calendar/map navigation, performance analytics, and automated invoicing.

BGB - Smart Call & App Blocker — Kotlin · Java · Android Accessibility · Multi-language

Advanced call/SMS/app/website blocker with usage analytics, multi-tier monetization, and full English/Turkish localization via custom Accessibility Services.

Calm Medical - Healthcare Super-App — Flutter · Dart · Firebase FCM · Payment Gateway

Dual-role medical app with appointment booking, birthday/anniversary-triggered flash sales, coupon redemption, and Traditional Chinese/English localization.

ACHIEVEMENTS & IMPACT

- Shipped 20+ production Android/Flutter apps to Google Play across agri-tech, healthtech, enterprise, and social domains; 30+ apps published in total across personal, enterprise, and client work.
- Contributed to 1.6M+ combined Play Store downloads, including a 500K-download astrology platform and a 100K-download agri-tech app.
- Led and mentored a 4-person mobile development team for 7 months, overseeing sprint planning, PR reviews, and on-time delivery of production features.
- Promoted to lead feature development within 2 years — independently owning architecture decisions, SDK integration, and Play Store releases.
- Integrated 12+ third-party SDKs (Agora, TensorFlow Lite, Firebase suite, Socket.IO, IoT BLE, YouTube API) with zero production incidents.
- Adopted AI-assisted development workflows (Claude AI, Cursor AI, Codex, Gemini, DeepSeek), cutting debugging and boilerplate time by approximately 40%.

EDUCATION

B.Tech - Information Technology, U.V. Patel College of Engineering, Ganpat University	2018 – 2022 CGPA: 7.84/10
HSC (Science), GSHEB Board	2018 61.10%

CERTIFICATIONS

- Android App Development Master Course with Java — Udemy
- The Complete Android Kotlin Developer Course — Udemy
- Introduction to Flutter Course — Simplilearn | SkillUp
